**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to an LCD comprising a liquid crystal display, classified in class 349, subclass 88.
- II. Claims 18-20, drawn to a method for manufacturing display device, classified in class 349, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, a method for manufacturing display device (invention II) can make different device display, in which the device display does not contain liquid crystal molecules.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Group I contains embodiments directed to the following patentably distinct species of the claims invention:

A: Claims 1-6 drawn to a display comprising a chamber to store a volume of liquid crystal material, the chamber having a viewable region and a non-viewable

Art Unit: 2871

region, and at least one polymer memory cell provided in a non-viewable region of the chamber.

B: Claims 7-14 drawn to a display comprising a chamber to store liquid crystal material, a plurality of display transistors arranged in an array across a planar surface of the chamber, the display transistors to define pixels of the display, a memory system having polymer memory cells provided within the liquid crystal chambers.

C. Claims 15-16 drawn to a computer system comprising an LCD display with the polymer memory cells.

D. Claims 15 and 17 drawn to a computer system comprising an LCD display with polymer memory system including a plurality of layers, each layer includes polymer memory cells distributed among LCD materials of the display.

If Group I is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2871

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296.
